Gawker Media LLC – Senior Linux Sysadmin 2005 – 2007

Gawker Media is a internationally known web publishing company with 15 titles to it's name. Some of these include Gawker, Gizmodo, Lifehacker, Wonkette, Kotaku and Deadspin. I designed and managed a web application cluster of 30 hosts.

Senior Network Engineer – Voice Dynamix 4/2005 – present

Voice Dynamix hired me to help their new business offer VoIP products and services. I do research and development with the Linux operating system, SIP Express Router and the Asterisk IP PBX in both hosted and embedded configurations.

The August Sound Coalition 2004 – present

The August Sound Coalition is a group of independent sound/transmission artists, journalists, and musicians who initially converged to create A-Noise, an autonomous media project coincident with the Republican National Convention and protests in New York City. August Sound Coalition survives as a collective based in New York, and will continue bringing our unique broadcasts to the public. Over the course of the next year we will work towards the development of new independent community radio stations for Brooklyn and lower Manhattan.

Network Consultant – Anatomical Travelogue Inc. 11/2004 – 02/2005

I was hired as a network services consultant. Using open source software, I built a secure internal Instant Messaging system, a complete email system and laid the framework for expansion of the Active Directory for authentication services across Windows and Linux systems. I also gathered metrics for network performance over the hybrid gigabit ethernet and fiber optic LAN.

Linux/BSD systems administrator -- Democracy Now! 2003 – 2004

I built and maintained automated online media publishing services for a daily hour long radio and television show. In addition I managed the website and LAN services across Linux, BSD, Windows and OS X servers.

Skills

| Systems | Networking | Languages |
|--|---|---|
| Debian GNU/Linux, Embedded Linux, OpenBSD, MacOS X, Windows Server | Hands on data center experience, IP, firewall design, CARP, Cisco IOS, Apache, Tomcat, DNS, Active Directory, Samba | Perl, PHP, Bash, HTML, XML, JavaScript, Pure Data, C |
